DETAILED ACTION

Drawings

Twelve (12) sheets of drawings were filed on 04/11/2006 and have been accepted by the examiner.

Specification

Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art cited on the attached from PTO-892 and/or on the Information Disclosure Statement filed by the Applicant, is the most relevant prior art known, however, the invention of Claims 1-16 distinguishes over the prior art of record for the following reasons.

Claims 1, 4, 7, 9, 12, and 15 are drawn to a memory reproduction unit. The closest prior art of record to the claimed invention are from Kurokawa 6,729,541 and to Imai JP2001-052128 of which was indicated in the applicant IDS filed 04/11/2006. However the prior art are silent to limitations as claimed in Claims above.

In regards 1,4, 7, 9, 12, and 15; the prior art of Kurokawa and Imai are both silent to the limitation of "a positioning mark light receiving element which receives a pair of positioning mark lights generated due to scattering and interference of the positioning/read light in the pair of positioning marks; and a light source positioned control unit which controls an incidence position of the positioning/read light with respect

to the core in a thickness direction thereof base intensities of the pair of positioning mark lights detected by the positioning mark light receiving element". The positioning marks are not taught by the two prior art above. Method Claims 9, 12, 15 claims the method of incidence positioning of an optical device. The method claims contains limitations of the "positioning marks" structure of the device claim 1, and further describes functional operation of the positioning marks in relation to optical component of Claim 1. Since the prior art does not teach the structure of the positioning marks, and the method claims of 9, 12, and 15 explicitly claims the structures "positioning marks" and their operational functionality. Therefore, the examiners has consider the method claims to be also allowable base on the prior art of record. Hence Claim 1, 4, 7, 9, 12, and 15 are allowable over the prior art. Claims 2-3 depends on Claim 1, claims 5-6 depends on claim 4, claim 8 depends on 7, claims 10-11 depends on 9, claims 13-14 depends on 12, and claim 16 depends on 15.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOANG TRAN whose telephone number is (571)272-5049. The examiner can normally be reached on 9:00AM - 5:00 PM.
